

Module 6 Exercise 1 Pseudocode:

Pseudocode:

Start

Declare String areaCode

Declare String phoneNumber

Declare Integer numMessages

Declare Real bill

Declare Real tax

Declare Real totalBill

Input areaCode

Input phoneNumber

Input numMessages

if numMessages is less than or equal to 100 then

bill = 5

else

if numMessages is less than or equal to 300 then

bill = 5 + (numMessages - 100) * 0.03

else

bill = 5 + (200 * 0.03) + (numMessages - 300) * 0.02

endif

endif

tax = bill * 0.14

totalBill = bill + tax

Output areaCode, phoneNumber, numMessages, bill, tax, totalBill
